1

15~∞

Here are Nature's friends, the friendly "Coïnx" monsters. Coïnx are kind monsters and are part of Nature, like earth, wind, rain, snow, mountains and seas. With the help of Coïnx, put the blocks in their correct position. Shall we go on a four-season tour through Spring, Summer, Fall and Winter with the Coïnx? Match the coloured blocks with the Coïnx!

## I. Components

2 Red 2 Yellow 2 Blue 2 Green 1 Purple

9 coloured blocks

19 mission cards  
(38 levels)

## II. Goal of the Game

'Coïnx' is a one-player puzzle game that requires the player to use their logical thinking ability and their spatial awareness to fill the mission card.

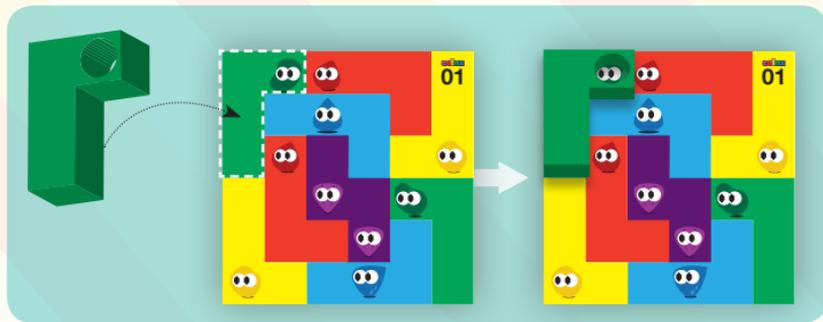

**Using all 9 coloured blocks**, the player must position the blocks on the Mission card so that the **Coïnx are visible through the holes**.

## III. Set up

At first, put all the blocks in front of you. Choose the Mission card you want as your challenge of the moment and place it on top of the Mission card deck.

The Mission cards are printed on both sides. Thus, there is a total of 38 different levels, level 1 being the easiest while level 38 is the hardest.

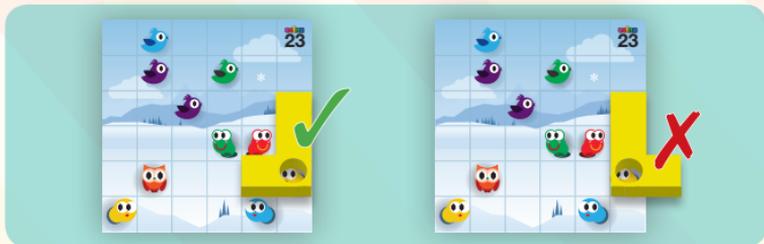

**Note** Levels 1 and 2 are only used for tutorial only. Put the blocks in exactly the same manner as depicted, matching both the colours and the shape. You shall then see Coïnx through each hole of the blocks.

# IV. How to Play

Now you will have to use the coloured blocks to fill the Mission card you selected. Try to do so with the following rules:

- 1 Use all 9 blocks.
- 2 Blocks cannot be placed outside of the card.

- 3 The colour of the block **must match the colour of the Coïnx** on the card.
- 4 Blocks cannot hide Coïnx. You must be able to see the Coïnx **through the holes** (and remember that **the colour must match!**).

- 5 If the Coïnx is gray, then you may use the coloured blocks of your liking.
- 6 Whenever you complete a card, move to the next one.

Coloured  
Coïnx

Gray  
Coïnx

## V. Game end

Coïnx is composed of 38 different levels.

Once you have completely covered the card with the 9 blocks and that all Coïnx on the Mission card are visible through the holes of the blocks (the colour of the Coïnx matching the colour of the block through which it is visible), then you have successfully solved the puzzle card. And if you clear all 38 levels, you will have become the master of the Coïnx!

<Come and see the various Coïnx!>
